PROFESSIONAL SUMMARY

Full Stack Software Engineer (5-year Engineering degree, ESPRIT) with 2 years of experience designing and delivering web applications in production. Builds Spring Boot REST APIs and Angular interfaces with tested, maintainable code (JUnit 5, Mockito). Experience on real-time SaaS platforms used by more than 100 clients, each managing multiple devices.

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer (Java / Angular) 01/2026 – Present

Virtual Mobile Data Solutions

VMDtrac V2: SaaS satellite tracking and fleet monitoring platform used by more than 100 clients, each managing multiple devices

- Designed asynchronous telemetry ingestion pipelines (Garmin inReach, Iridium SBD, SPOT, cellular networks) with data normalization, deduplication and consolidation.
- Reduced PostgreSQL/TimescaleDB query response times by 40%.
- Secured multi-tenant access with Zitadel IAM (OIDC, JWT, RBAC), ensuring data isolation across 100+ clients.
- Built real-time geospatial monitoring in Angular: fleet tracking, trip history and multi-device views per client.
- Delivered critical business features: SOS alerts, overspeed detection, geofencing and multichannel notifications.

Sales management and commission automation platform

- Automated sales target tracking and commission calculation.
- Synchronized data with Odoo 17 through REST APIs (two-way exchange), eliminating manual re-entry.

Technologies: Java 17, Spring Boot, Angular, PostgreSQL, TimescaleDB, Zitadel, Docker, Odoo 17

Full Stack Software Engineer (Java / Angular) 10/2024 – 12/2025

SMLTP

- Designed secured Spring Boot REST APIs (JWT, Spring Security, RBAC) for personnel management and access control across multiple sites.
- Developed an Angular / TypeScript application (RxJS, lazy loading) synchronized in real time with multiple biometric devices.
- Integrated external SDKs and APIs, with unit and integration tests (JUnit 5, Mockito).
- Automated Docker deployments on Linux through CI/CD pipelines.

Technologies: Java 17, Spring Boot, Angular, TypeScript, RxJS, Spring Security, JUnit 5, Mockito, Docker, Linux

Full Stack Software Engineer, Final-Year Internship 02/2024 – 09/2024

Ooredoo Tunisia

- Developed Spring Batch jobs for ingestion and reconciliation of large datasets, reducing daily manual interventions by 90%.
- Designed REST APIs (Spring Boot, Spring Data JPA) exposing log metrics to business teams.
- Built an Angular monitoring portal with dashboards integrating Power BI.
- Set up a Jenkins CI pipeline with automated tests, SonarQube analysis and builds.

Technologies: Java 11, Spring Boot, Spring Batch, Spring Data JPA, Angular, Jenkins, SonarQube, Linux

EDUCATION

National Engineering Diploma in Computer Science (5-year, Master's level) 2024

ESPRIT

Bachelor's Degree in Software Engineering and Information Systems (3-year) 2021

ISSATM

TECHNICAL SKILLS

- **Backend:** Java 8/11/17, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring Batch, Microservices, REST APIs, OpenAPI/Swagger
- **Frontend:** Angular, TypeScript, JavaScript ES6+, RxJS, HTML5, CSS3/SCSS, Angular Material, Bootstrap
- **DevOps and Tools:** Docker, Kubernetes, Jenkins, GitLab CI/CD, Git/GitFlow, Maven, Postman, Linux, Nginx
- **Databases:** PostgreSQL, TimescaleDB, MySQL, Hibernate, JPA, SQL
- **Testing and Quality:** JUnit 5, Mockito, SonarQube, unit and integration testing, Clean Code
- **Methodologies:** Agile/Scrum, Code Review, Jira

PROJECTS

Sales and Commercial Management Web Platform (live in production)
Technologies: Java 11, Spring Boot, Angular, Spring Data JPA, PostgreSQL, Nginx
- Developed and deployed an application for sales, quotes, inventory and invoicing management.
- Layered architecture, JWT security, SQL/Hibernate query optimization.

Distributed E-Commerce Application and Cloud-Native Infrastructure
Technologies: Spring Boot (Microservices), Angular, Docker, Kubernetes, GitLab CI/CD, PostgreSQL
- Developed a modular platform (catalog, cart, orders).
- Containerized and orchestrated with Kubernetes; automated tests and deployments with GitLab CI/CD.
